

Question0: Zadanie 3. (0-2) Czy przekonanie, że zwiedzanie jest zawsze szkodliwym, wyrażone w tekście Olgi Stanisławskiej, znajduje potwierdzenie w tekście Agnieszki Krzemińskiej? Uzasadnij odpowiedź, odwołując się do obu tekstów.

Correct Answer0: Yes, in Kneminakes text it is marked that visiting places by lots of tourists can be dangerous for locals privacy security.

Student Answer0: No. Traveling and visiting is always good and provide benefits for local society

Grade: The student's response partially covers the question as they argue that traveling and visiting always provide benefits for local society. However, they do not directly address the concept of "zwiedzanie" as a form of "zawłaszczaniem" as mentioned in Olga Stanisławska's text, nor do they reference Agnieszka Krzemińska's text. Therefore, the response covers around 25% of the question. Question1: Question 41. What are main causes of bipolar disorder?

Correct Answer1: Main causes of bipolar disorder are childhood trauma, stressful life events and brain chemistry.

Student Answer1: Stressful lifestyle or childhood trauma may lead to bipolar disorder.

Grade: The student's response covers the main causes of bipolar disorder, mentioning stressful lifestyle and childhood trauma as contributing factors. However, there is a minor spelling error in "traumamay." The student's response aligns with the expected answer provided by the teacher. I would rate the student's answer at 95%. Question2: Question 5 What is schizophrenia

Correct Answer2: Schizophrenia is a chronic brain disorder that affects less than one percent of the U.S. population.

Student Answer2: Schizophrenia is a chronic brain disorder

Grade: The student's response covers the main aspect of the question by stating that schizophrenia is a chronic brain disorder. It aligns well with the teacher's answer, which also mentions schizophrenia as a chronic brain disorder. I would rate this response as 100% correct. Question3: Question 6 What are the symptoms of generalized anxiety disorder (GAD)?

Correct Answer3: Main symptoms of GAD are restlessness, extreme tiredness, trouble focusing, grouchiness and increased muscle tension.

Student Answer3: Restlessness , extreme tiredness, grouchiness and problem with focusing

Grade: The student's response covers most of the symptoms of generalized anxiety disorder (GAD) mentioned by the teacher, such as restlessness, extreme tiredness, grouchiness, and trouble focusing. However, it missed mentioning increased muscle tension. The student's answer aligns with the teacher's response by around 75%. Question4: Question 7 What is obsessive-compulsive disorder (OCD)?

Correct Answer4: OCD is a long-lasting disorder in which a person experiences uncontrollable and recurring thoughts (obsessions), engages in repetitive behaviors (compulsions) or both.

Student Answer4: It is a long-lasting mental disorder. Person with OCD experiences obsesions and compulsions

Grade: The student's response covers the key points of OCD being a long-lasting mental disorder involving obsessions and compulsions, but there are some spelling errors and missing details. I would rate this response as 70% accurate compared to the teacher's expected answer.
